Work Experience

Data Analyst | Upmeals | Vancouver, BC (On-site) August 2025 – July 2026

- Contributed to **Demi (UpMeals OS)**, a food management platform for recipe management, food costing, production & operations planning, by analyzing **500+ daily records** to identify costing & inventory inefficiencies and developing **4+ Power BI** dashboards & data visualizations for production KPIs, contributing to a **4% reduction** in inventory costs across **2+ departments.**
- Evaluated **1M+ transactional records** using **advanced SQL, Python** and statistical techniques to identify customer, product, and operational trends; delivered insights that supported initiatives contributing to **7% improvement in process efficiency**.
- Developed **10+ Power BI dashboards** and enterprise reporting solutions, leveraging **SQL, DAX, Power Query and data modeling** to automate recurring reporting and reduce manual analysis by **25+ hours/month** (approx.).
- Owned **end-to-end analytics requirements for 2+ business functions**, facilitating **3+ stakeholder workshops** with product, operations, finance, and tech teams; converted requirements into **4+ user stories, KPI definitions, and acceptance criteria**.
- Collaborated with **business leaders**, developers and QA through **Agile delivery**, validating **20+ data/reporting requirements**, resolving **15+ data-quality issues**, and presenting executive insights that informed **8+ business decisions**.

Data Analyst | Deloitte | Bengaluru, India (Hybrid) June 2024 – June 2025

- Analyzed **2M+ customer and operational records** using SQL and Python to identify revenue, retention, and process trends; translated findings into **15+ executive KPIs** and Power BI dashboards that reduced recurring reporting effort by **35%**.
- Led **requirements gathering** across **5+ stakeholders and 3 client teams**, translating business problems into **25+ reporting requirements, KPI definitions, data models, and technical specifications** while serving as the primary analytics POC.
- Built and automated **12+ Power BI dashboards and SQL-based reporting workflows**, integrating **5+ data sources** and reducing manual reporting time by **20+ hours/month** while improving data accessibility for **100+ users**.
- Presented **analytical findings and recommendations to client leadership and cross-functional teams**, conducting **root-cause analysis** on **10+ operational issues** and supporting initiatives that improved process efficiency by **15%**.

Business Analyst | Skill Safari | Vadodara, India (On-site) June 2021 – July 2022

- Worked closely with business stakeholders to identify growth opportunities, **design A/B experiments**, and communicate insights that **increased conversion rates by 10%.**
- Cooperated with cross-functional teams to **document functional requirements**, user stories, process flows & develop and maintain **dashboards, providing real-time insights** that **improved** project tracking **efficiency by 25%**.

PROJECTS

Stock Market Analysis | Project Link |

Technologies: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Monte Carlo Simulations, K-means Clustering, Jupyter Notebook

- Achieved a **3x return over the past two decades**, outperforming the **S&P 500 by 15%**, and visualized performance using advanced data visualizations that enhanced decision-making.
- Applied **Python libraries (Pandas, NumPy, Matplotlib)** and machine learning techniques (K-means clustering, Monte Carlo simulations), analyzing over **200+ stocks** to develop actionable investment strategies that **reduced risk exposure by 10%.**

Wasabi Bank Transaction Analysis | Project Link |

Technologies: Power BI, SQL, Python (Pandas, NumPy), Data Cleaning, Statistical Analysis, Anomaly Detection

- Examined **150,000+ ATM transactions** across 5 Nigerian cities using SQL and statistical profiling, identifying **45% higher weekend usage** and demographic spending patterns to drive data-informed resource allocation.
- Applied Z-score/IQR anomaly detection to **flag 12+ high-risk transactions** and identified a **35% holiday usage drop**; optimized ATM deployment and maintenance strategies, with an estimated **18% improvement in service availability**.

SKILLS

Programming: Python, R, SQL.

AI, ML & Cloud: Machine Learning, Generative AI, Prompt Engineering, Predictive Modeling, Azure ML, AWS, Databricks.

Data Engineering: PySpark, ETL Pipelines, SQL Optimization, Data Warehousing, Data Visualization, Data Modeling, Data Integrity.

Analytics: MS Excel, Power BI, Tableau, Snowflake, Statistics, DAX/Power Query, Dashboard Development.

Business Skills: Root Cause Analysis, Requirements Gathering**,** Stakeholder Management, Cross-functional Collaboration, Business Consulting, Executive Reporting, Data Storytelling, Strategic Decision Making, Agile Development.

CERTIFICATIONS

Microsoft Certified Azure Data Scientist: Expertise in Azure-based data analysis and machine learning.
Google Advanced Data Analytics: Expertise in leveraging Python, SQL, and statistics to clean, analyze, and visualize complex datasets.

EDUCATION

Master of Professional Studies in Analytics | Northeastern University (GPA: 3.75/4) Sep 2022 – Apr 2024

Bachelor of Technology in Information and Technology | Parul University (GPA: 3.5/4) Jun 2018 – May 2022
